TOPIC Bremenhain AirfieldEVALUATION                      PLACE OBTAINED                      25X1DATE OF CONTENT                     DATE OBTAINED                      DATE PREPARED 31 March 1953REFERENCES                     PAGES 1 ENCLOSURES (NO. & TYPE)                     REMARKS                     This is UNEVALUATED Information

1. In January 1953, construction work was being done on an airfield about 25 km north of Goerlitz, located in a triangle formed by the Rothenburg-Bremenhain-Lodenau road and the railroad line leading from Rothenburg to Lodenau. Fourteen freightcars loaded with squared timber and construction material were observed on a railroad siding which branched off between Rothenburg and Lodenau and extended to the west. There were also two low wooden buildings.                      workers were hired in the vicinity, who were promised a special high pay and a bonus. 25X1

2. On 18 February, low wooden buildings were under construction in the woods west of the Rothenburg-Lodenau railroad line, northeast of Bremenhain. Ten buildings were definitely observed.                      a total of 42 low wooden buildings were under construction there. Construction material, including fuel tanks, were stored near the railroad line. 25X1

                     Comment. Previously, only preliminary construction work was under way at Bremenhain airfield.                      25X1
